***Claim Rejections - 35 USC § 103***

1. Claims 66-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Colvin et al (6,602,289).

See previous office action.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Applicant's remarks have been considered, however the above rejections are still deemed to be proper. Applicant argues that the Colvin device is 'not dimensioned to be placed in the coronary sinus of the heart'. However, the Colvin device still *could* be placed there, if desired. Further, the diameter of the coronary sinus varies from patient to patient, including nonhuman animals, and therefore would be able to fit in some. Still further, the Colvin device could also provide for the intended use, as stated in

Art Unit: 3762

applicant's claim 1, that 'effects the condition of the mitral valve annulus of a heart'. The device of Colvin is considered to be able to *effect* the mitral valve if it is placed inside the coronary sinus of the patient, as opposed to around the valve itself. The term 'effect' is considered to be broad enough to encompass any type of impact on the mitral valve annulus. Thus, the Colvin device could accomplish the intended functions of applicant's claims. Also, re claim 69, the device of Colvin can be bent in a number of directions, depending upon user preferences, and the term 'shape' is broad enough to accommodate the structure of Colvin.
